

R-PP2R

Refrigerator protector

350 Joules

Energy Absorption

R-Series Advanced Power Protection

A full line of products designed for the modern family with advanced features and characteristics needed for today's modern devices.

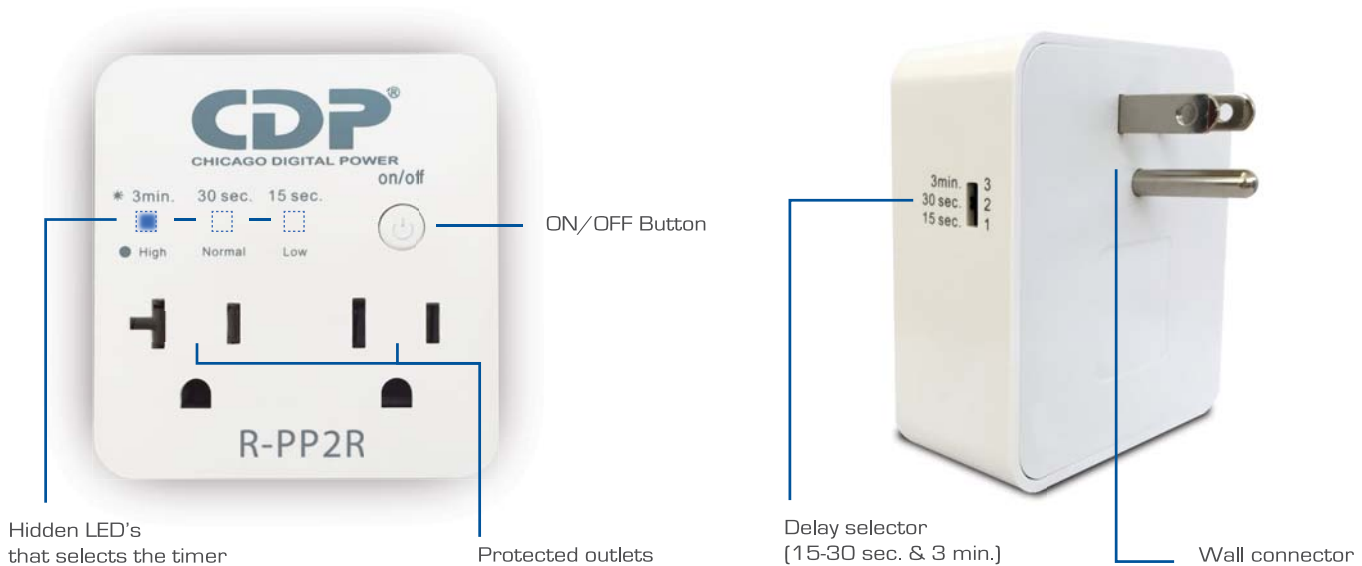

R-PP2R Refrigerator protector

The R-PP2R is an over current suppressor, designed to extend the life of your equipment with high load, such as refrigerators and air conditioners. Since the compressor is a sensitive part of these equipment and can suffer a damage with some alteration of the domestic energy to which the equipment is exposed.

Its ultra lightweight and compact design makes it more attractive, it is powered by AC from a common outlet in your home, but the main function is to protect your equipment from those energy discharges or sudden cuts in them, which cause irreparable damage. Protects the refrigerator, monitoring the quality of the electric current, with an energy delay. The system has 15, 30 seconds or 3 minutes, which allows the compressor to depressurize and reduce the high current demands that affect the surrounding equipment.

MODEL	R-PP2R
Input capacity(watts)	1800W (15A)
Input voltage (Vca)	120Vca
Input voltage range(Vca)	90~140Vca
Delay selector	15 - 30 seg. & 3 min.
Reaction capacity	350 joules
